LOTS OF EXTRAS FOR ROUTINE, EVERYDAY USE

All system components and accessories were specifically developed for medical settings. This range of mobile and stationary ITD equipment carriers features logical and consistent compatibility combined with modularity. This means that each carrier system can be fitted to meet the challenges of routine, everyday operations. The range of accessories is so comprehensive that it is able to meet virtually any requirement.

Jointed arms with hose clamps

Infusion stand with 4-arm safety bottle holder

Variable height jointed arms for flat screens

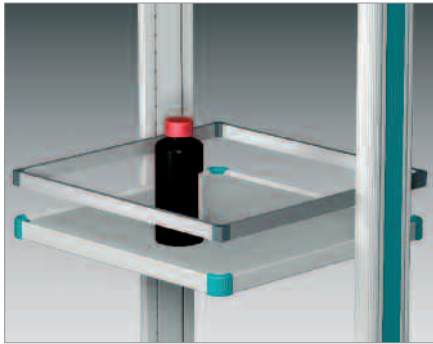

Endoscope holders

Gas bottle holders

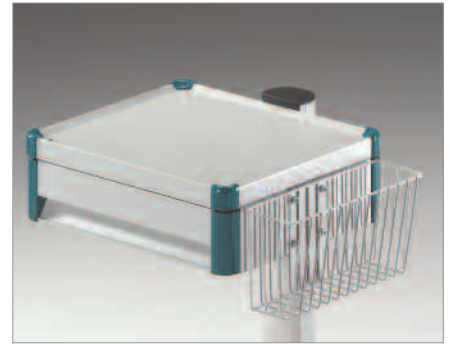

Rear doors (lockable) and rear panels

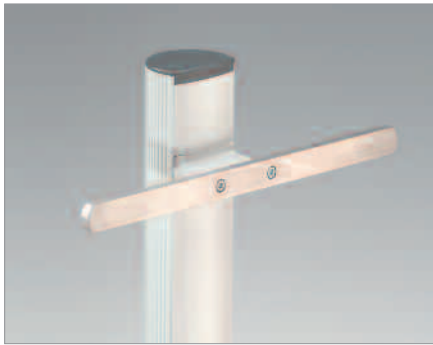

Continuous galleries

Drawers, roller-guided

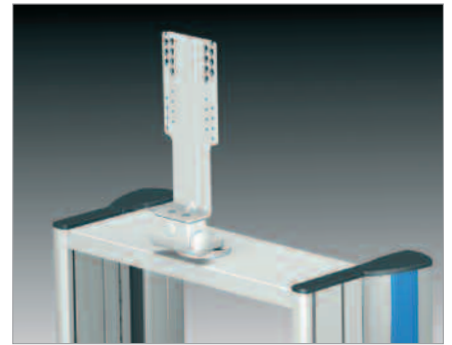

Baskets

Standard runners

Socket strips conforming to the relevant guidelines

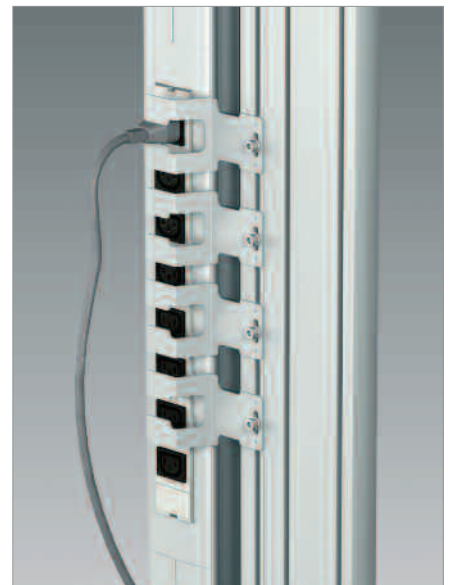

Monitor holders in different versions

Handles in different sizes and versions

Shelves

Plug removal barriers

BASIC FRAME uni-cart

Basic frame uni-cart (4 Stabilizers)

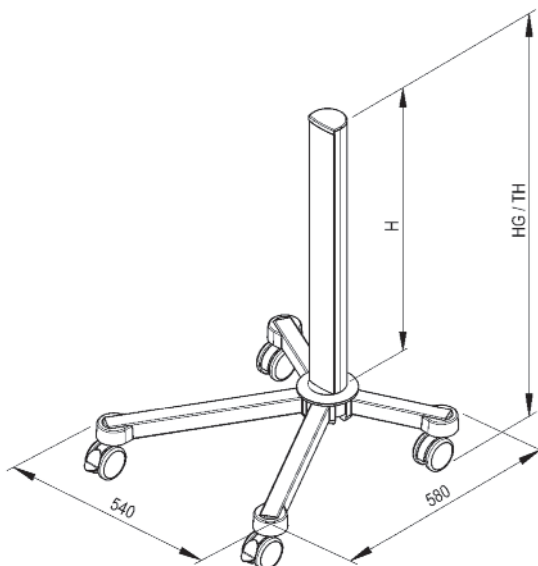

The basic frame **uni-cart** with 4 stabilizers provides a secure solution for mounting all projecting system modules, such as drawers and shelves, because the angle (6° increments) and length of the stabilizers can be adapted to suit individual requirements. This combination provides a high level of stability and flexibility. The basic frame is also resistant to twisting and has optimum tilt stability combined with a small footprint. The support column offers neat and concealed cable routing. An integrated strain relief protects outgoing cabling. Socket strips, infusion rods or monitor holders can also be easily integrated.

Load capacity: 50 kg / 110 lbs
Material: Aluminium / steel
Finish: RAL 7035 Light Grey powder-coated

Scope of delivery:

- 1 base unit with 4 stabilizers
- 4 twin swivel castors, 2 with wheel lock, with wall protector
- 1 support column
- 1 counterweight kit (only in **uni-cart** with 35 U¹⁾)

How supplied: Partly assembled

Note:

In order to guarantee maximum stability, we recommend that you check equipment carts with installed original equipment in conformity with EN60601 and order a counterweight kit as necessary.

	Installation height H	Total height TH	Castors	Order number
uni-cart basic frame with 4 stabilizers	21 U ¹⁾	820 mm	Ø 75 mm	RS.4008.991
	30 U ¹⁾	1145 mm	Ø 100 mm	RS.4011.991
	35 U ¹⁾	1305 mm	Ø 100 mm	RS.4027.991
Counterweight kit for 4 stabilizers (is integrated in the stabilizers at the factory)				RS.0344.999

¹⁾ 1 U = 32 mm

BASIC FRAME uni-cart

Basic frame uni-cart (5 stabilizers)

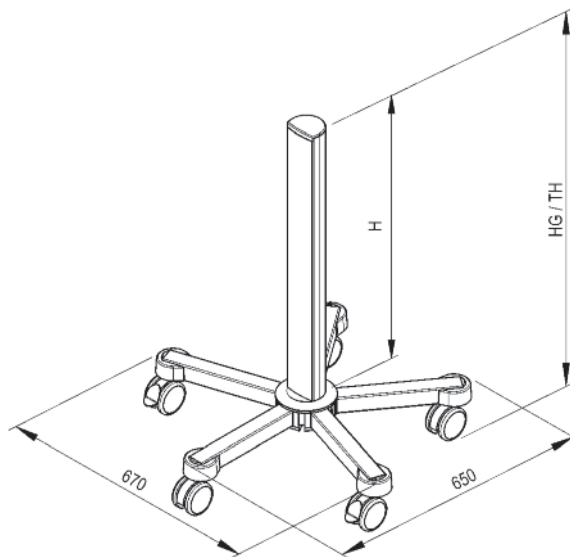

The basic frame **uni-cart** with 5 stabilizers is resistant to twisting and has a high tilt stability combined with a small footprint. The support column offers neat and concealed cable routing. An integrated strain relief protects outgoing cabling. Socket strips, infusion rods or monitor holders can also be easily integrated. The angle (6° increments) and length of the stabilizers can be adapted to suit individual requirements. This combination provides a high level of stability and flexibility. The basic frame with 5 stabilizers is ideal for centrally positioned payloads, e.g. attachment of a monitor holder, an infusion stand, a basket, standard runners or a gas bottle holder.

Load capacity: 50 kg / 110 lbs
Material: Aluminium / steel
Finish: RAL 7035 Light Grey powder-coated

Scope of delivery:

- 1 base unit with 5 stabilizers
- 5 twin swivel castors, 2 with wheel lock, with wall protector
- 1 support column
- 1 counterweight kit (only with **uni-cart** with 35 U¹⁾)

How supplied: Partly assembled

Note:

In order to guarantee maximum stability, we recommend that you check equipment carts with installed original equipment in conformity with EN60601 and order a counterweight kit as necessary.

BASIC FRAME **pro-cart**

Basic frame **pro-cart**

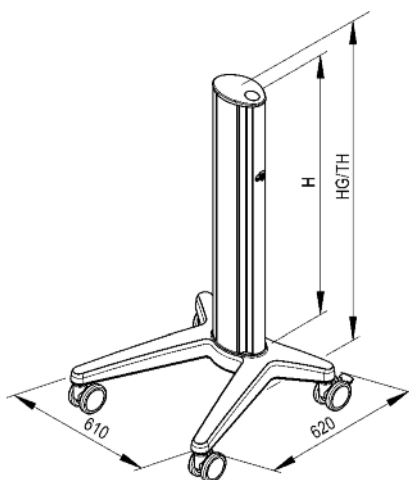

The aluminium design of the basic frame **pro-cart** provides a high load rating despite low-weight construction. The design of the base guarantees a high level of resistance to twisting and space-saving integration of an isolating transformer (see page 174). The spacious support column delivers safe power supply and effective cable management. All standard socket strips can be accommodated with ease.

Load capacity: 80 kg / 176 lbs
Material: Aluminium
Finish: RAL 7035 Light Grey powder-coated
 Cover cap and cover strips in RAL 7043 Traffic Grey B

Scope of delivery:

- 1 base unit
- 4 twin swivel castors Ø 100 mm, 2 with wheel lock
- 1 support column

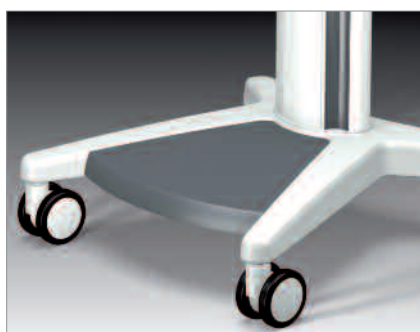

How supplied: Fully assembled

	Installation height H	Total height TH	Order number

	30 U ¹⁾	1172 mm	PT.4001.991
	35 U ¹⁾	1332 mm	PT.4002.991

Basic trim for **pro-cart**

The stylish basic trim provides a design element and is positioned between the front stabilizers.

Load capacity: 5 kg / 11 lbs
Material: Plastic (ABS)
Finish: RAL 7043 Traffic Grey B
Scope of delivery: 1 basic trim with mounting hardware

	Product line	Order number
Basic trim	■	PT.2001.800

¹⁾ 1 U = 32 mm

BASIC FRAME classic-cart

Basic frame classic-cart Profi

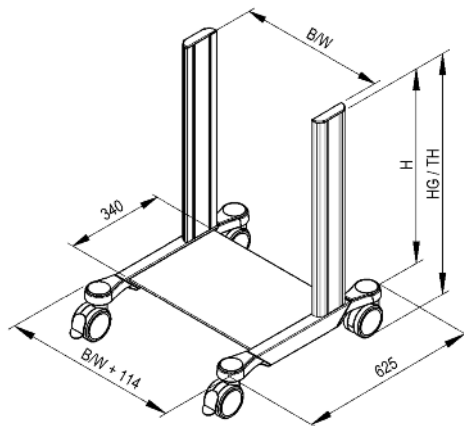

The basic frame **classic-cart** Profi has a high level of resistance to twisting and high mounting capacity. The frame also offers lots of options for expansion and upgrading. Optional power columns (see page 108) offer separate routing for large volumes of power cables and data lines or integration of socket strips. The colours of the decorative trims can be matched to the equipment or corporate CI. There is also the option of fitting the equipment cart with a powerful isolating transformer (see page 175) and a rear panel (see page 109).

Load capacity: 150 kg / 330 lbs
Material: Aluminium / steel
Finish: RAL 7035 Light Grey powder-coated
Trim elements: See ¹⁾

Scope of delivery:

- 1 base unit
- 4 twin swivel castors (Ø 100 mm), 2 with wheel lock
- 2 vertical extrusions
- 2 decorative trims

How supplied: Fully assembled

Note:

You will find power columns for the basic frame Profi on page 108!

²⁾ 1 U = 32 mm

BASIC FRAME compact-cart

Basic frame compact-cart Economy

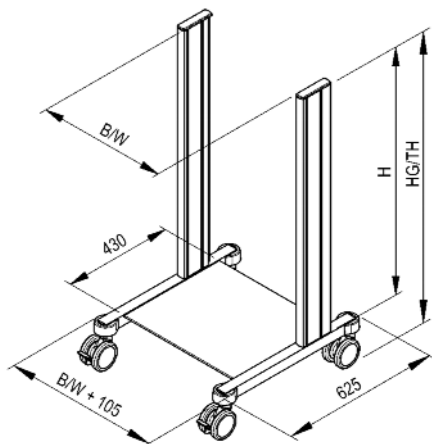

The basic frame **compact-cart** Economy meets expectations for a functional, mobile equipment cart and has a high level of resistance to twisting. The design of the base also provides an optimum ratio of storage area to work area. Small cable volumes can easily be accommodated in the support columns.

Load capacity: 150 kg / 330 lbs
Material: Aluminium / steel
Finish: RAL 7035 Light Grey powder-coated

Scope of delivery:

- 1 base unit
- 4 twin swivel castors Ø 100 mm, 2 with wheel lock
- 2 vertical extrusions

How supplied: Fully assembled

BASIC FRAME compact-cart

Basic frame compact-cart Profi

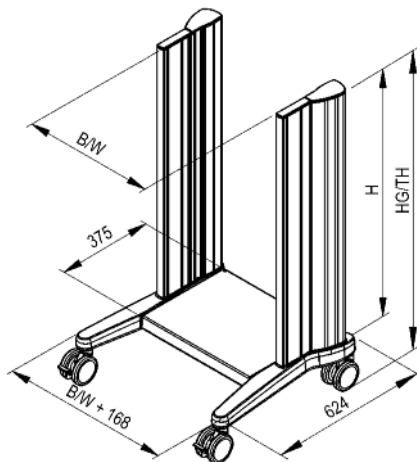

The basic frame **compact-cart** Profi has a high level of resistance to twisting. The projecting position of the castors guarantees outstanding tilt stability. The design of the base also guarantees an optimum ratio of storage area to work area. In addition to meeting the demands for a functional equipment cart, the spacious power columns of the basic frame Profi also provide expanded capacity for separate cable routing of large volumes of power cables and data lines, and accommodation of all standard socket strips. The result is safe power supply and effective cable management. The colours of integrated trims can be matched to the equipment or corporate CI. There is also the option of fitting the equipment cart with a powerful isolating transformer (see page 176) in the base.

Load capacity: 180 kg / 396 lbs
Material: Aluminium / steel
Finish: RAL 7035 Light Grey powder-coated
Trim elements: See ¹⁾

Scope of delivery:

- 1 base unit
- 4 twin swivel castors Ø 100 mm, 2 with wheel lock
- 2 vertical extrusions
- 2 power columns
- 2 decorative trims

How supplied: Fully assembled

²⁾ 1 U = 32 mm

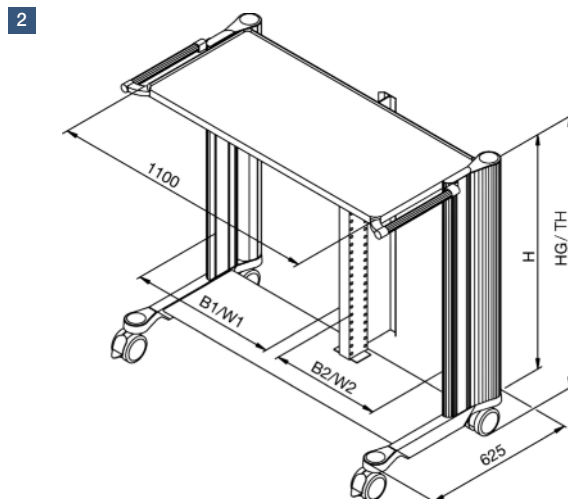

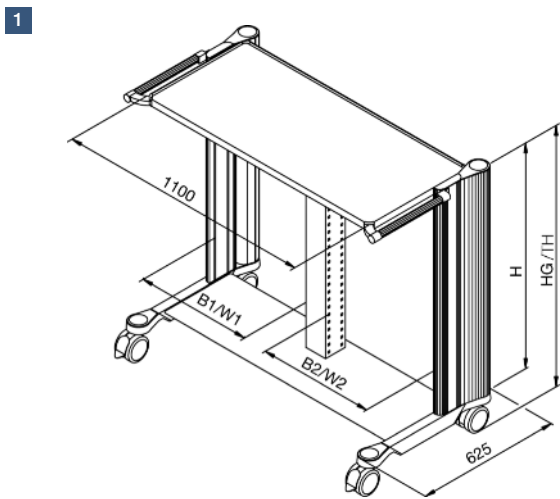

BASIC FRAME **endo-cart**

Basic frame **endo-cart**

The basic frame **endo-cart** has a high load capacity and stability. A continuous upper platform 1100 mm in width offers a large storage area. The base unit accommodates the vertical extrusions, the power columns and the centre column. The decorative trims are insertable in the vertical extrusions and provide options for a choice of individual colour and graphic design. The basic frame also gives the option of integrating a powerful isolating transformer (see page 175) and optionally lift-out rear panels (see page 109).

- Load capacity:** 150 kg / 330 lbs
Material: Aluminium / steel
Finish: RAL 7035 Light Grey powder-coated
Trim elements: See ¹⁾
Scope of delivery:
- 1 base unit
 - 4 twin swivel castors Ø 100 mm, conductive, 2 with wheel locks
 - 2 vertical extrusions 30 U²⁾
 - 2 power columns 30 U²⁾
 - 1 centre column as cable duct
 - continuous upper shelf, each with a handle left and right
- How supplied:** Fully assembled

Note:

See page 109 for rear panels for basic frame **endo-cart**.

endo-cart basic frame	Installation height H	Total height TH	Installation widths W1 / W2	Order number
1 Symmetrical width division	30 U ²⁾	1117 mm	500 / 500 mm	EC.0400.XXX
2 Asymmetrical width division	30 U ²⁾	1117 mm	450 / 600 mm	EC.0402.XXX

²⁾ 1 U = 32 mm

BASIC FRAME **endo-cart**

Basic frame **endo-cart** (with extended vertical extrusion)

The basic frame **endo-cart** with extended vertical extrusions and standard runner (L 1100 mm) offers the advantage of the basic version combined with the opportunity to mount additional accessories, e.g. multipurpose boxes, in a space-saving configuration. The decorative trims insertable in the vertical extrusions provide options for a choice of individual colour and graphic design.

Load capacity: 150 kg / 330 lbs

Material: Aluminium / steel

Finish: RAL 7035 Light Grey powder-coated

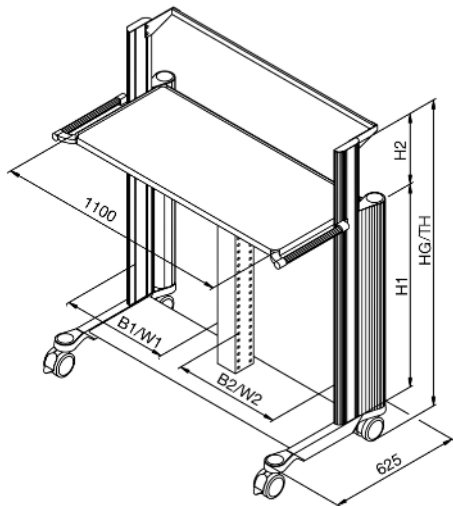

Trim elements: See ¹⁾

Scope of delivery:

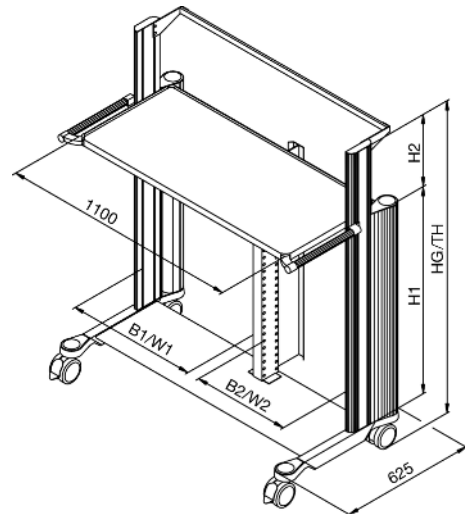

- 1 base unit
- 4 twin swivel castors Ø 100 mm, conductive, 2 with wheel locks
- 2 vertical extrusions 40 U²⁾
- 2 power columns 30 U²⁾
- 1 centre column as cable duct
- continuous upper shelf, each with a handle left and right
- 1 standard runner

How supplied: Fully assembled

POWER COLUMNS

Power columns for classic-cart basic frame Profi

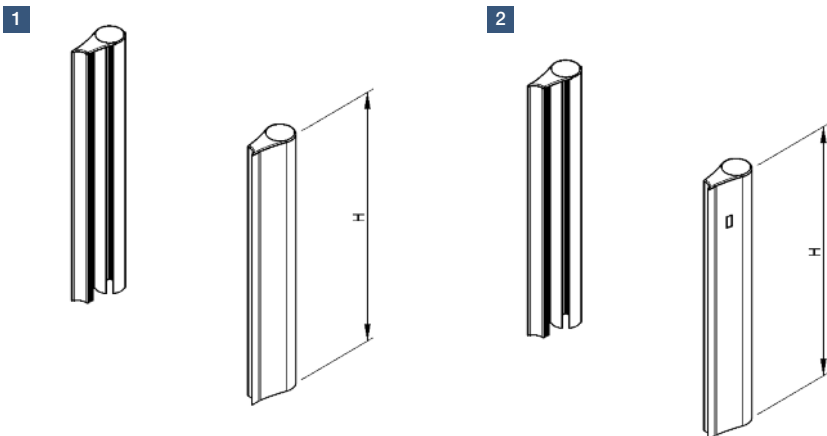

The aluminium extrusion with two spacious cable shafts offers lots of storage space for cable management. Power cables and data lines can be routed separately to individual units. This means socket strips can be enclosed and integrated over the full height of the columns. Continuous soft cover extrusions protect cabling. Quick-release cable ties provide fast cable fixing.

Power columns can also be supplied with a cutout for installing a central on/off switch. This is a convenient option for switching all equipment on or off. The switch is installed in the right-hand power column and is necessary for accommodating isolating transformers, socket strips, etc.

- Material:** Extruded aluminium
- Finish:** RAL 7035 Light Grey powder-coated
- Scope of delivery:** 2 power columns with mounting hardware

System components and accessories

REAR PANELS

Rear panel for **classic-cart** basic frame Profi

The rear panel can be removed with two quick fasteners. It protects equipment against unauthorized access and offers fast access to units for assembly and service operations.

- Material:** Sheet steel
Finish: RAL 7035 Light Grey powder-coated
Scope of delivery: 1 rear panel with mounting hardware
How supplied: Factory assembly only

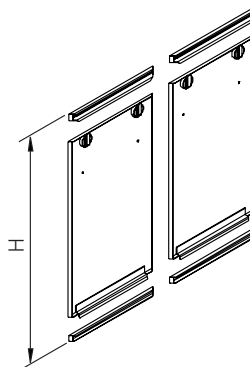

Note:

- Rear panels can only be used in combination with power columns (see page 108)!
- Rear doors can be supplied on request!

REAR DOORS

Rear doors for **compact-cart** basic frame Profi

The lockable rear doors offer optimum protection against unauthorized access at the rear side of equipment and also provide a perfect solution from hygienic and visual perspectives. The large opening angle (135°) of the doors provides unimpeded access to the rear side of the equipment for maintenance and service operations. The door can also easily be removed if required.

- Material:** Sheet steel
Finish: RAL 7035 Light Grey powder-coated
Scope of delivery: 1 double door
 1 cross connector
 with mounting hardware
How supplied: Pre-assembled

CASTOR CONVERSION KIT

Castor conversion kit

ITD equipment carts come as standard fitted with Ø 75 mm or Ø 100 mm castors. The castors have a medium coating hardness and are therefore suitable for all floor coverings. We also supply the following castors – in each case supplied as a castor conversion kit instead of the standard version described:

- 1 Ø 100 mm, conductive or non-conductive; with wheel lock
 - 2 Ø 100 / Ø 125 mm, conductive; with wheel lock
 - 3 Wall protector (soft polyethylene wheels Ø 100 mm) suitable for castors Ø 100 mm and Ø 125 mm
- Scope of delivery:** 4 bumper wheels, 4 spacers

Load capacity per castor:

- Ø 100 mm: 75 kg / 164 lbs
- Ø 125 mm: 100 kg / 220 lbs

Note:

Please note the maximum load rating of each basic frame.

The following applies for all basic frames:

Scope of delivery: 1 castor conversion kit (4 castors, including 2 castors with wheel lock)
How supplied: Factory assembly only

The following applies to the uni-cart basic frame with 5 stabilizers:

Scope of delivery: 1 castor conversion kit (5 castors, 2 castors with wheel lock)
How supplied: Factory assembly only

SHELVES

The shelves have the following features:

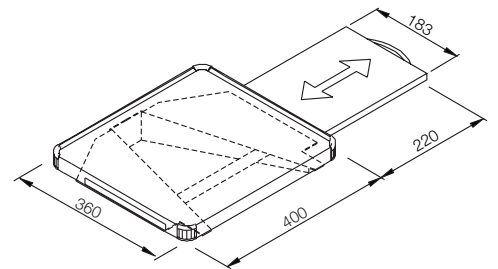

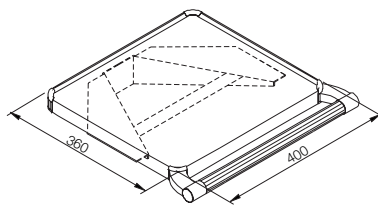

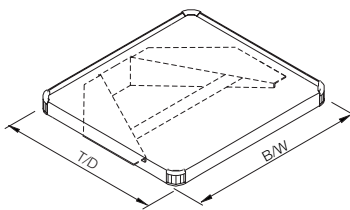

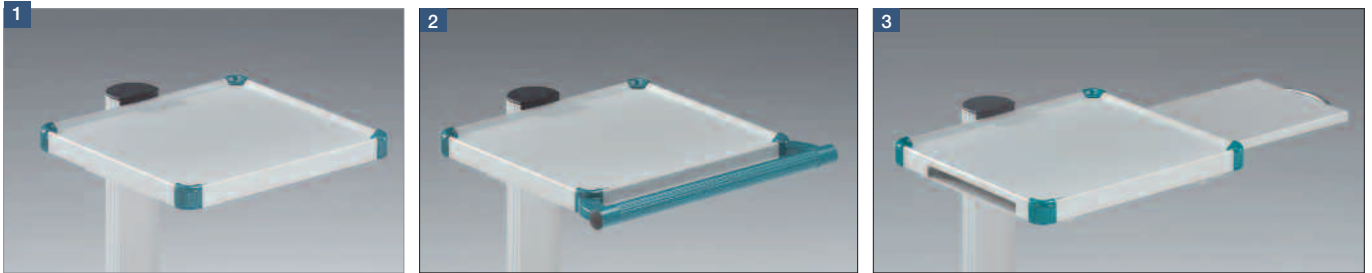

- The continuous raised edge provides a secure platform for valuable medical equipment.
- The rounded corners protect users from injuries.
- The corners are an important design element¹⁾ offering a choice of colours. They play a key role in defining the CI of the customer.
- The low installation height of only 32 mm saves installation space and creates valuable work space.
- The powder-coated finish is easy to clean and resistant to cleaning agents and disinfectants.

Shelves for uni-cart

The shelves for **uni-cart** are supplied in different versions:

- 1 Shelf
- 2 Shelf with handle
- 3 Shelf with mousepad
- 4 Shelf with handle and mousepad (not shown)

Material: Sheet steel
Assembly: In the front T-slots of the support column
Platform area: 400 mm x 360 mm (W x D)
Load capacity: 10 kg / 22 lbs (distributed load)
Finish: RAL 7035 Light Grey powder-coated, trim elements see ¹⁾
Scope of delivery: 1 shelf incl. bracket and mounting hardware
How supplied: Pre-assembled

Note:

The mousepad can be pulled out to the right. On request, a left-hand pullout can be supplied.

SHELVES

Shelf pullout for **classic-cart** and **endo-cart**

The pullout shelf permits fast access to your equipment for assembly and servicing. It can also be used as a keyboard shelf or writing shelf. The pullout measures 265 mm and permits unrestricted access from all sides to the installed equipment. Detent points in the open or closed position allow the shelf to be fixed in these positions. The handle at the front makes it easier to move the shelf in and out.

- Material:** Sheet steel
- Load capacity:** 20 kg / 44 lbs (distributed load)
- Finish:** RAL 7035 Light Grey powder-coated, trim elements see 1)
- Scope of delivery:** 1 shelf with mounting hardware
- How supplied:** Pre-assembled

2) 1 U = 32 mm

KEYBOARD DRAWERS

The keyboard drawer has the following features:

- The low installation height saves installation space and creates valuable work space.
- Adjustable bars or struts, depending on the model, prevent the keyboard from sliding when the shelf is moved.
- Cables are routed safely and protected against possible damage when the keyboard is moved in and out.
- The powder-coated finish is easy to clean and resistant to cleaning agents and disinfectants.
- The latch mechanism enhances user convenience and security in the open and closed position

Keyboard drawer with / without mousepad

The keyboard drawer has a low installation depth of 2 U²⁾. Two small keyboards can be positioned behind each other when fully extended (345 mm). An adjustable strut prevents the keyboard from sliding when the shelf is moved.

Material: Sheet steel

OVERVIEW OF MONITOR HOLDERS

The same swivel and tilt unit forms the heart of the monitor holder at ITD. The monitor brackets presented in this catalogue are all mounted on this unit. All the monitor brackets have a VESA 75 / 100 adapter and a load rating between 8 kg / 17.6 lbs and maximum 14 kg / 30.8 lbs.

The following presentation gives a brief overview of the monitor holders supplied as standard and the options for attachment.

Swivel and tilt unit	Monitor bracket ¹⁾
<p>The swivel and tilt unit has the following features:</p> <ul style="list-style-type: none"> ■ It permits a tilt of $\pm 15^\circ$ and a swivel range of $\pm 158^\circ$. ■ The limit of the swivel range can be adjusted to suit individual situations. ■ The frictional force can be adjusted variably depending on the weight of the monitor. ■ The load capacity is up to a maximum of 14 kg / 30.8 lbs.  <ul style="list-style-type: none"> ■ Future-proof with easy exchange of monitor bracket – also with retrofitting. 	<div style="display: flex; align-items: center;">  <div style="margin-left: 20px;"> <ul style="list-style-type: none"> ■ VESA 75 / 100 ■ Load rating up to maximum 8 kg / 17.6 lbs </div> </div> <hr/> <div style="display: flex; align-items: center;">  <div style="margin-left: 20px;"> <ul style="list-style-type: none"> ■ VESA 75 / 100 ■ Load rating up to maximum 14 kg / 30.8 lbs </div> </div> <hr/> <div style="display: flex; align-items: center;">  <div style="margin-left: 20px;"> <ul style="list-style-type: none"> ■ VESA 75 / 100 ■ Load rating up to maximum 14 kg / 30.8 lbs ■ Depth and height adjustable </div> </div> <hr/> <div style="display: flex; align-items: center;">  <div style="margin-left: 20px;"> <ul style="list-style-type: none"> ■ The universal adapter is designed to accommodate adapter panels. ■ Load rating up to maximum 14 kg / 30.8 lbs </div> </div>

DRAWERS

The drawers have the following features:

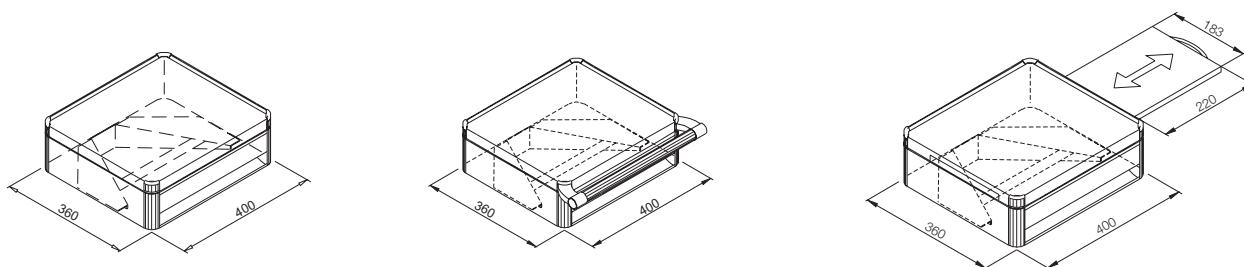

- Roller-guided $\frac{3}{4}$ self-retracting slides guarantee easy-slide drawers.
- The lift-out drawer unit makes cleaning easy.
- An integrated labelling strip on the front trim gives an immediate overview.
- The powder-coated finish is easy to clean and resistant to cleaning agents and disinfectants.
- The top for the drawer is always a shelf. Users derive benefit from the continuous raised edges.
- The rounded edges protect against injury and also provide an important design element for presenting the CI of the customer

Drawers for uni-cart

The block of drawers for **uni-cart** comprises the following components, depending on the design:

- 1 Shelf and drawer (including bracket)
- 2 Shelf with handle and drawer (including bracket)
- 3 Shelf with mousepad and drawer (including bracket)
- 4 Shelf with handle, mousepad and drawer (including bracket; not shown)

1) **Trim colour:** Make sure you replace .XXX by .901 = RAL 5021 Water Blue, .902 = RAL 5013 Cobalt Blue, .903 = RAL 7035 Light Grey
 2) 1 U = 32 mm

DRAWERS

Drawers for pro-cart

The block of drawers in the product line **pro-cart** is fitted with a mechanical one-hand lock. This ensures that the drawers cannot open independently when the cart is pushed over a threshold.

The **pro-cart** block of drawers is supplied in the following versions:

- 1 Block of drawers without handle on shelf
- 2 Block of drawers with handle on shelf
- 3 Block of drawers with mousepad (right / left pullout), with and without handle on shelf
- 4 Block of drawers high, 1 unit, with and without handle on shelf

Interior area: 340 mm x 240 mm x 80 mm
(W x D x H) 340 mm x 240 mm x 175 mm (drawer high)

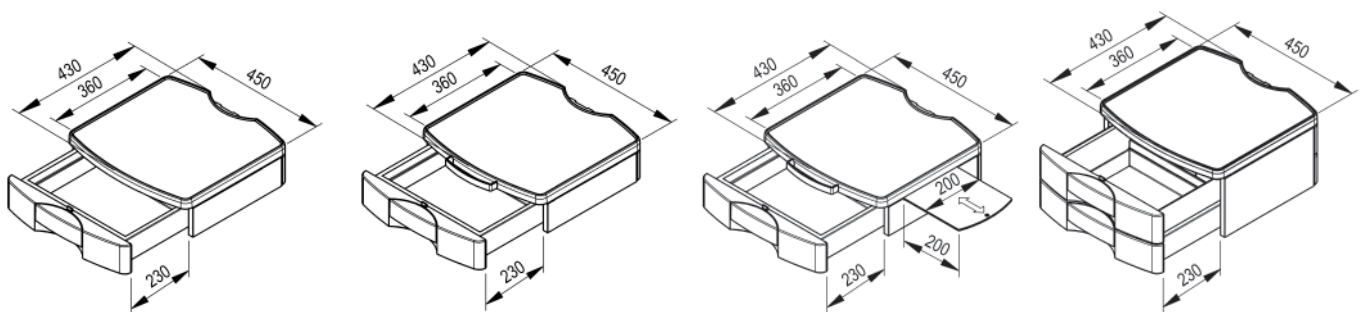

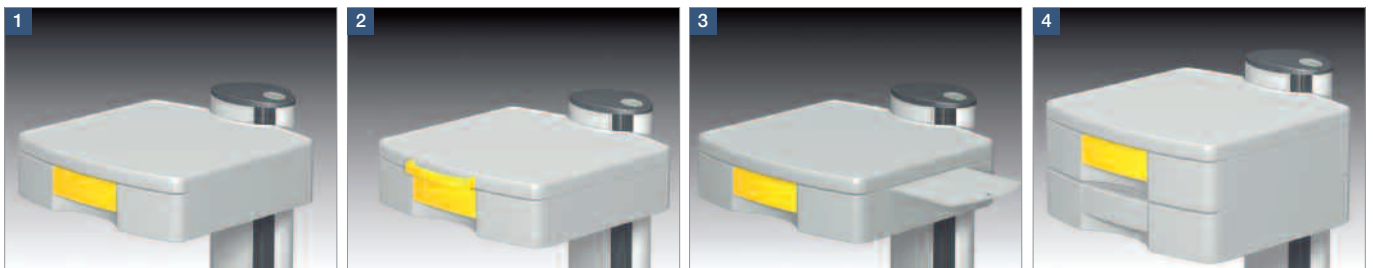

Load capacity: Shelf: 15 kg / 33.0 lbs distributed load
Drawer: 3 kg / 6.6 lbs distributed load

Material: Aluminium / sheet steel

Finish: RAL 7035 Light Grey powder-coated, trim elements see 1)

Scope of delivery: 1 block of drawers, with mounting hardware

How supplied: Pre-assembled

Block of drawers	Installation height	Product line	Order number
1 2 Block of drawers	1 without handle on shelf	■	PT.4104.XXX
	2 with handle on shelf	■	PT.4105.XXX
3 Block of drawers with mousepad	without handle on shelf	■	PT.4106.XXX
	with handle on shelf	■	PT.4107.XXX
4 Block of drawers high, 1 unit	without handle on shelf	■	PT.4113.XXX
	with handle on shelf	■	PT.4114.XXX

1) **Trim colour:** Make sure you replace .XXX by .903 = RAL 7035 Light Grey, .908 = RAL 5015 Sky Blue, .909 = RAL 1003 Signal Yellow

2) 1 U = 32 mm

DRAWERS

Drawers for classic-cart and endo-cart

All drawer types in the product line **classic-cart** and **endo-cart** are fitted with a latch mechanism. This ensures that the drawers cannot open independently when the cart is pushed over a threshold.

The drawer is supplied in the following versions:

- 1 Drawer
- 2 Drawer high, 1 unit

Interior area: for W 450: 360 mm x 400 mm x 85 mm
 (W x D x H) 360 mm x 400 mm x 180 mm (drawer high)
 for W 500: 410 mm x 400 mm x 85 mm
 410 mm x 400 mm x 180 mm (drawer high)
 for W 600: 510 mm x 400 mm x 85 mm
 510 mm x 400 mm x 180 mm (drawer high)

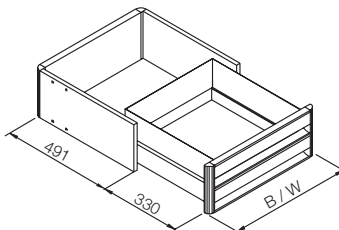

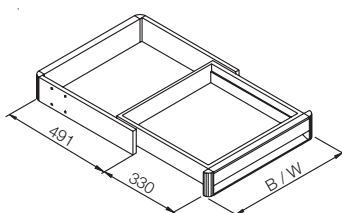

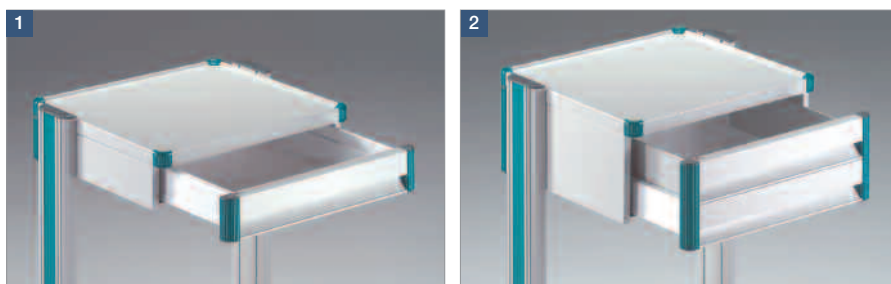

Load capacity: 3 kg / 6.6 lbs distributed load (without lock)
 20 kg / 44 lbs distributed load (with lock)

Material: Sheet steel / plastic

Finish: RAL 7035 Light Grey powder-coated, trim elements see 1)

Scope of delivery: 1 drawer or drawer high with mounting hardware

How supplied: Pre-assembled

Note:

You always require a shelf of appropriate width as the top cover for the drawer (see page 114)! This is not included in the scope of delivery.

Drawers	Installation height	Product line	Order number for installation width		
			W 450 mm	W 500 mm	W 600 mm
1 Drawer	3 U ²⁾		GW.4051.XXX	GW.5051.XXX	GW.6051.XXX
2 Drawer high, 1 unit	6 U ²⁾		GW.4052.XXX	GW.5052.XXX	GW.6052.XXX

Lock on request

1) **Trim colour:** Make sure you replace .XXX by .901 = RAL 5021 Water Blue, .902 = RAL 5013 Cobalt Blue, .903 = RAL 7035 Light Grey

2) 1 U = 32 mm

Drawers for compact-cart

All drawer types in the product line **compact-cart** are fitted with a latch mechanism. This ensures that the drawers cannot open independently when the cart is pushed over a threshold.

The drawer is supplied in the following versions:

- 1 Drawer
- 2 Drawer high, 1 unit

Interior area: for W 450: 360 mm x 400 mm x 85 mm
 (W x D x H) 360 mm x 400 mm x 180 mm (drawer high)
 for W 500: 410 mm x 400 mm x 85 mm
 410 mm x 400 mm x 180 mm (drawer high)
 for W 650: 510 mm x 400 mm x 85 mm
 510 mm x 400 mm x 180 mm (drawer high)

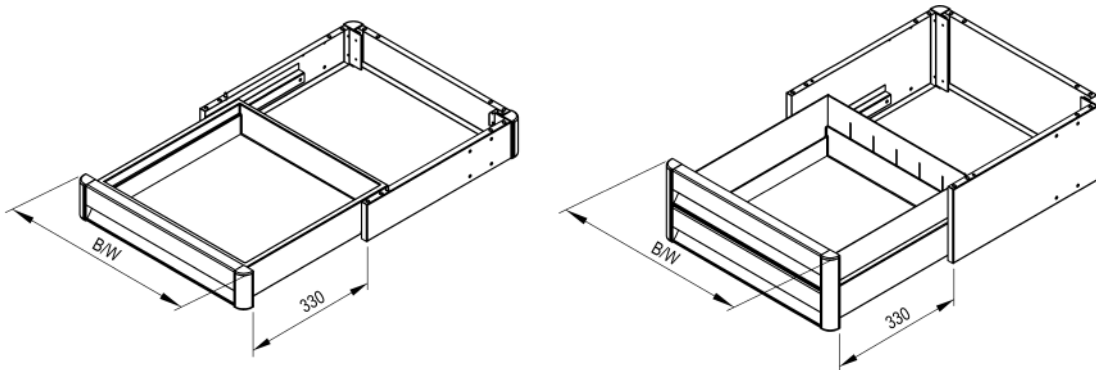

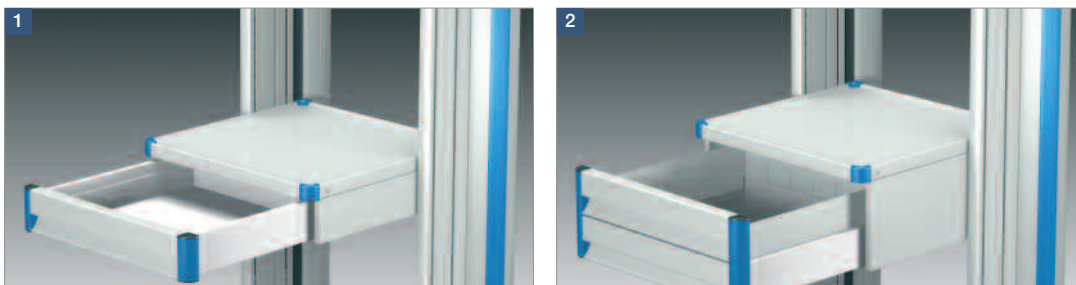

Load capacity: 3 kg / 6.6 lbs distributed load (without lock)
 20 kg / 44 lbs distributed load (with lock)

Material: Sheet steel / plastic

Finish: RAL 7035 Light Grey powder-coated, trim elements see 1)

Scope of delivery: 1 block or drawer high with mounting hardware

How supplied: Pre-assembled

Note:

You always require a shelf of appropriate width as the top cover for the drawer (see page 115)! This is not included in the scope of delivery.

Drawer	Installation height	Product line	Order number for installation width		
			W 450 mm	W 500 mm	W 650 mm
1 Drawer	3 U ²⁾		CC.4540.XXX	CC.5040.XXX	CC.6540.XXX
2 Drawer high, 1 unit	6 U ²⁾		CC.4541.XXX	CC.5041.XXX	CC.6541.XXX

Lock on request

1) **Trim colour:** Make sure you replace .XXX by .903 = RAL 7035 Light Grey, .908 = RAL 5015 Sky Blue, .909 = RAL 1003 Signal Yellow

2) 1 U = 32 mm

BASKETS

Storage basket

The storage basket is used for storing medical accessories and is supplied in different versions:

1 Storage basket tapered for **uni-cart** und **pro-cart**

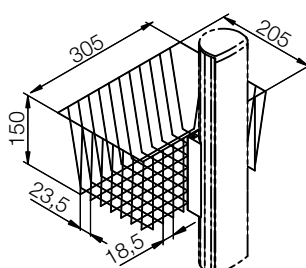

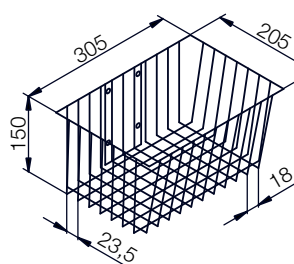

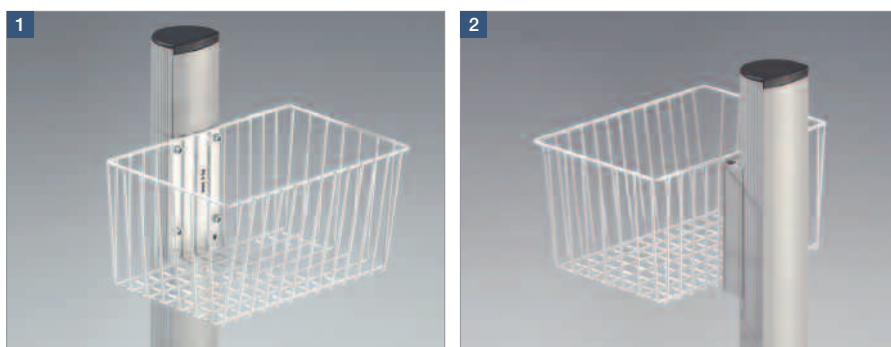

Assembly: In the front T-slots
 Mesh width: Inside dimension 18.5 mm or 23.5 mm
 Material: Steel wire
 Finish: RAL 9016 White, fluidized-bed coated

2 Storage basket tapered for **uni-cart**

Assembly: Factory assembly only, with an adaptor extrusion on the rear side of the support column
 Mesh width: Inside dimension 18.5 mm or 23.5 mm
 Material: Steel wire
 Finish: RAL 9016 White, fluidized-bed coated

Load capacity: 3 kg / 6.6 lbs distributed load

Scope of delivery: 1 basket with mounting hardware, **2** with 1 additional adapter extrusion

Note:

A mounting kit is necessary for attaching the storage basket **1** to the vertical extrusions of the equipment carts **classic-cart** with power column, **compact-cart** and **endo-cart**.

Storage basket	Installation height	Product line	Order number
1 Storage basket tapered	5 U ¹⁾		ZV.9967.800
2 Storage basket tapered, assembly on the rear section	5 U ¹⁾		ZV.9989.991
Mounting kit			ZV.9422.999

¹⁾ 1 U = 32 mm

Storage basket

The storage basket is used for storing medical accessories and is supplied in different versions:

1 Stainless steel basket for **uni-cart** and **pro-cart**

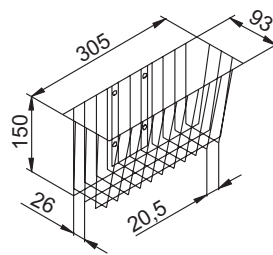

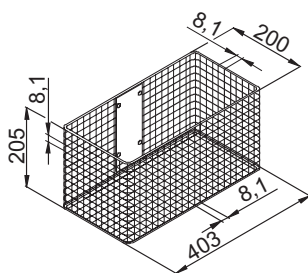

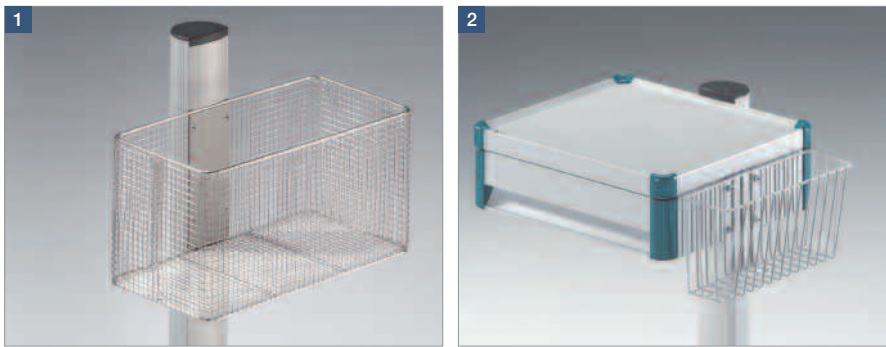

Assembly: In the front T-slots
 Mesh width: 8.1 mm
 Material: Stainless steel wire

2 Storage basket tapered for **uni-cart** and **pro-cart**

Assembly: In the front T-slots
 Assembly on the side sections can only be carried out in the factory.
 Mesh width: 20.5 mm
 Finish: RAL 7035 Light Grey powder-coated

Load capacity: 3 kg / 6.6 lbs distributed load

Scope of delivery: 1 basket with mounting hardware

Note:

A mounting kit is necessary for attaching the storage basket to the vertical extrusions of the equipment carts **classic-cart**, **compact-cart** and **endo-cart**.

Storage basket	Installation height	Product line	Order number

HOLDERS FOR MEDICAL ACCESSORIES

Endoscope holders have the following features:

- They are designed to hold an endoscope (all standard brands) without introducing any kinks.
- Adjusting the height allows the holder to accommodate endoscopes up to 2 m long.
- The holder (height adjustable) provides attachment and protection.

Endoscope holder

The endoscope holder is supplied in single or dual version:

- 1 Endoscope holder **single**
Assembly: In the vertical extrusion
- 2 Endoscope holder **single**
Assembly: On two shelves or on two standard runners
- 3 Endoscope holder **single**
Assembly: In the support column of **uni-cart** and **pro-cart**
- 4 Endoscope holder **dual**
Assembly: In the vertical extrusion
- 5 Endoscope holder **dual**
Assembly: On two shelves or on two standard runners

Material: Support: polypropylene
Holder: polypropylene fibreglass reinforced
Telescopic bar: steel chrome-plated, with one-hand operation

Scope of delivery: 1 endoscope holder incl. appropriate mounting hardware

Endoscope holder	Product line	Order number
1 single – for assembly in the guide of the vertical extrusion		GW.0393.800
2 single – for assembly on the shelf / standard runner		GW.0394.991
3 single – for assembly in the support column		RS.0115.800
4 dual – for assembly in the guide of the vertical extrusions		GW.0472.800
5 dual – for assembly on the shelf / standard runner		GW.0473.991

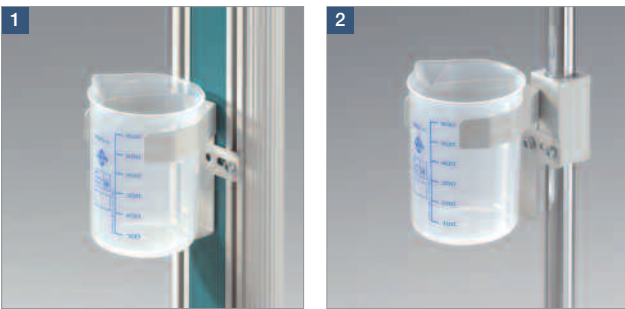

HOLDERS FOR MEDICAL ACCESSORIES

Drain glass

The drain glass can be mounted as follows:

- 1 Using spring nuts at any height in the outer T-slot of the vertical extrusion or on the support column.
- 2 Using an attachment clamp attached directly on the telescopic bar of the endoscope holder to be height adjustable.

Content: 600 ml
Material: Drain glass made of polypropylene resistant to temperatures up to 135°C, holder made of sheet steel
Finish: Drain glass transparent milky
 Holder RAL 7035 Light Grey powder-coated
Scope of delivery: 1 Drain glass incl. appropriate fixings and mounting hardware

		Product line	Order number
Drain glass	1		ZV.9963.999

HOLDERS FOR MEDICAL ACCESSORIES

Camera holder

The camera holder is intended for mounting the camera head (horizontal or vertical) at the eyepiece and is supplied in the following designs:

1 2 Camera holder:

- Assembly:** Underneath / at the side of the shelf
- Material:** Polyamide Black
- Scope of delivery:** 1 camera holder with mounting hardware

3 Camera holder with clamp:

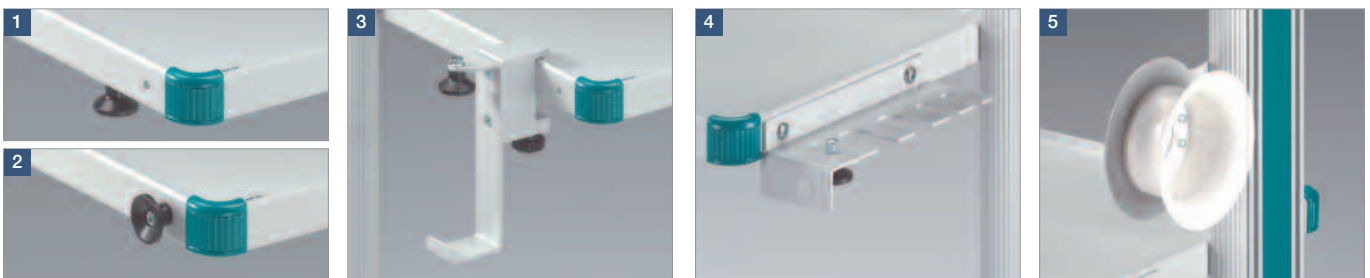

- Note:** The camera holder with clamp is designed to be moved around on the shelf. The camera head is mounted vertically here. The cable hook is used to wind up the cabling.
- Material:** Camera holder: Polyamide Black;
Clamp holder: Sheet steel / aluminium, RAL 7035 Light Grey powder-coated
- Scope of delivery:** 1 camera holder with clamp holder, with mounting hardware

4 Camera holder with mounting:

- Note:** The camera holder with mounting (several options with different diameters) is ideal for camera heads and fibre-optic cables with varying diameters.
- Material:** Camera holder: Polyamide Black;
Mounting: Aluminium, RAL 7035 Light Grey powder-coated
- Scope of delivery:** 1 camera holder with mounting hardware
- How supplied:** Factory assembly only

5 Cable holder:

- Note:** The cable holder is intended for safe and reliable mounting of e.g. light guides or fibre-optic cables. The large diameter Ø 130 mm of the drum prevents any kinking in sensitive lines.
- Material:** ABS White and sheet steel RAL 7035 powder-coated
- Scope of delivery:** 1 cable holder with mounting hardware

Foot switch shelf

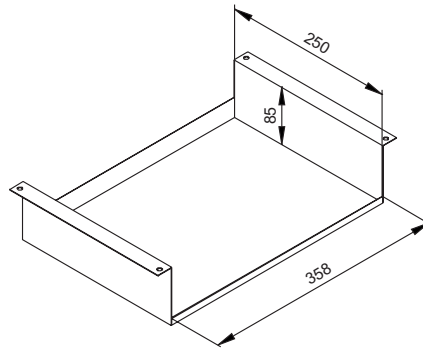

The foot switch shelf is mounted under the crosspiece of the basic frames. This allows the foot switch and cabling to be securely stored when the cart is in transit between locations.

Platform area for switch: 358 mm x 250 mm x 85 mm (W x D x H)

Material: Sheet steel

Finish: RAL 7035 Light Grey powder-coated

Scope of delivery: 1 Foot switch shelf with mounting hardware

Note:

- The foot switch shelf can only be used in combination with castors Ø 125 mm (see page 111 for more detailed information on the castors)!
- Simultaneous assembly of isolating transformer and foot switch is only possible in **endo-cart**. Alternatively, the foot switch cradle (see below) can be used in this scenario.

	Product line	Order number
Foot switch shelf		ZV.9980.991

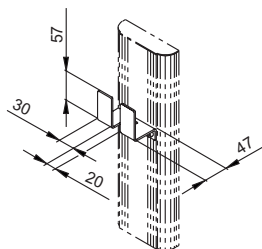

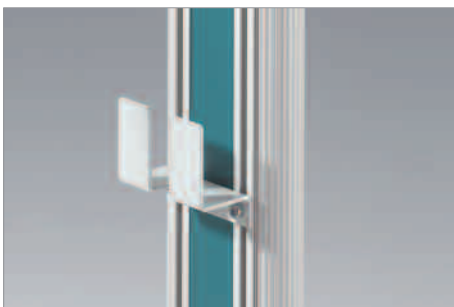

Foot switch cradle

The foot switch cradle is mounted on the vertical extrusion or on the support column.

“Dracula” box holder

The “Dracula” box holder has a spring-loaded slide to accommodate a wide range of standard commercial box sizes for tissues, wipes, disposable gloves, etc. Self-adhesive tapes provide easy mounting at the rear. Dracula can also be mounted using screws and plugs.

Material: Plastic White
Scope of delivery: 1 unit with mounting hardware

	Product line	Order number
“Dracula” box holder		ZV.9832.999

JOINTED ARMS

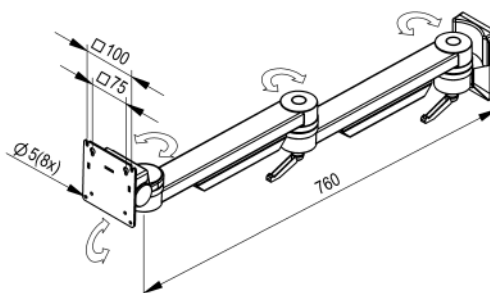

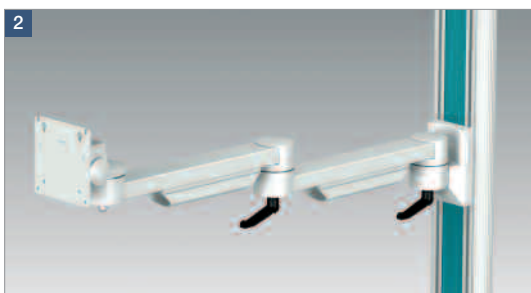

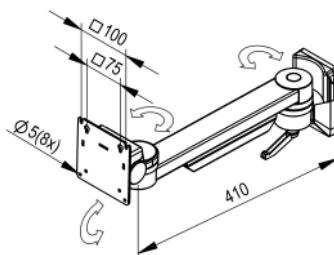

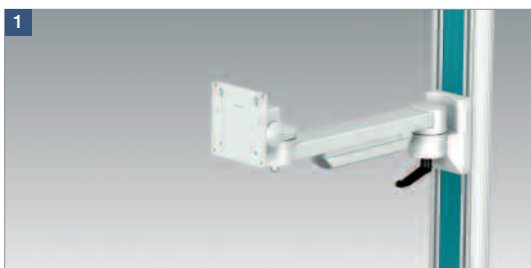

Modularity links stationary and mobile equipment carts

ITD GmbH is able to draw on the comprehensive range of jointed arms available in the **modul-port** stationary carrier system when it comes to configuring equipment carts – thanks to the 32/64 mm increments facilitating interchangeability between product lines and the resulting modularity. Mounted on the outside vertical extrusion, the jointed arms are used, e.g. to accommodate flat screens, and they allow the screens to be adjusted to an ergonomically comfortable position. A small sample of jointed arms is provided below. A complete overview is provided in the catalogue for stationary carrier systems. You can request this catalogue from the address printed on the reverse or access it on the Internet.

Pivot arm with VESA 75 / 100

This pivot arm is supplied in 1-unit and 2-unit versions and is fitted with a swivel and tilt unit including VESA 75 / 100 adapter. The arm is assembled on the support column or on vertical extrusion of the equipment cart.

- Load capacity:** 15 kg / 33 lbs
- Material:** Steel, aluminium
- Finish:** RAL 7035 Light Grey powder-coated
- Scope of delivery:** 1 pivot arm with swivel and tilt unit
incl. adapter VESA 75 / 100 and mounting hardware

Note:

In order to guarantee maximum stability, we recommend that you check equipment carts with installed original equipment in conformity with EN60601 and order a counterweight kit as necessary.

Pivot arm	Product line	Order number
1 Pivot arm 1-unit for flat screen VESA 75 / 100		TS.6314.991
2 Pivot arm 2-unit for flat screen VESA 75 / 100		TS.6315.991

JOINTED ARMS

Variable height arm with VESA 75 / 100

Mounted at right or left on the outside vertical extrusion, the jointed arms are used e.g. for mounting a flat screen. This adjustment allows the monitor to be adjusted individually to the right position.

- 1 Variable height arm 1-unit, total length approx. 750 mm
- 2 3 Variable height arm 2-unit, total length approx. 1190 mm

Assembly: At the side on the outside of the vertical extrusion for **classic-cart**, **compact-cart** and **endo-cart**

Load capacity:

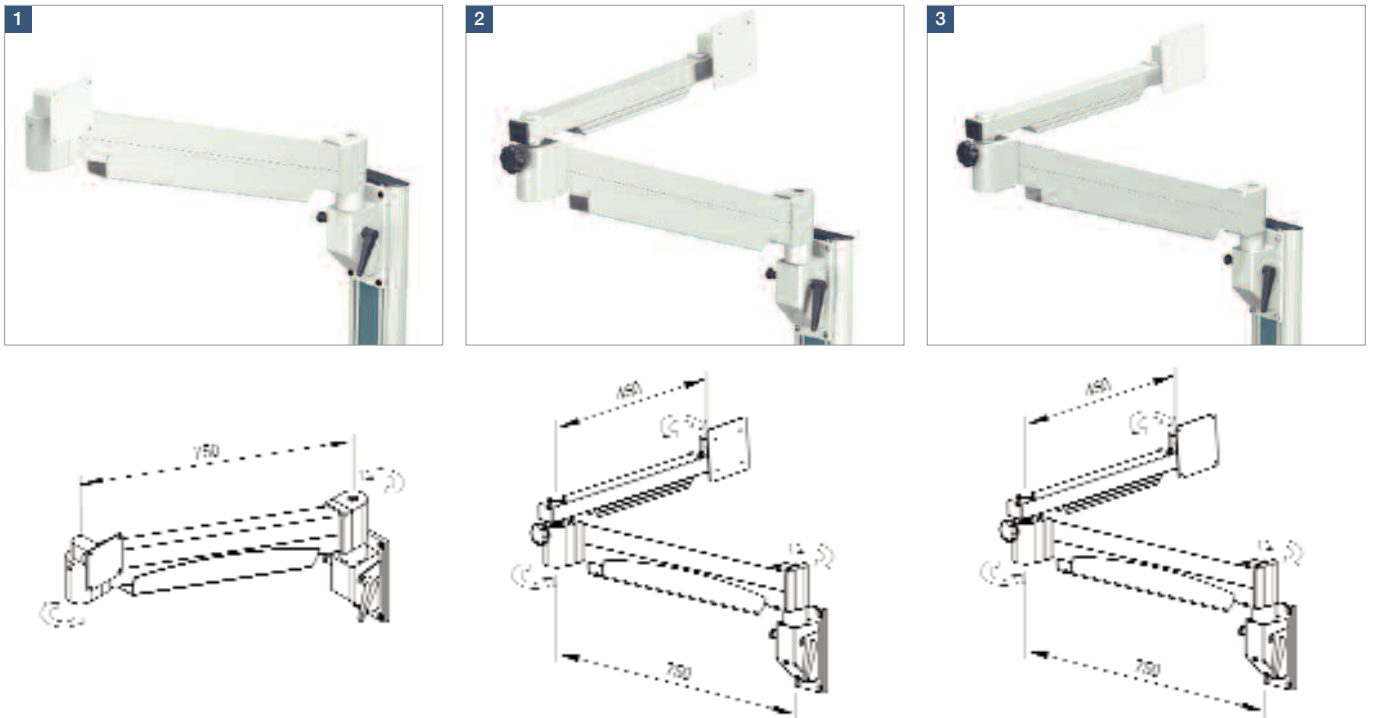

- 1 2 3-8 kg / 11-17.6 lbs alt. 6-10 kg / 13.2-22 lbs
- 1 10-13 kg / 22-28.6 lbs
- 3 8-13 kg / 17.6-28.6 lbs

Material: Steel, aluminium

Finish: RAL 7035 Light Grey powder-coated

Scope of delivery: 1 height-adjustable arm with mounting hardware

How supplied: Pre-assembled

Note: When a variable height arm is mounted on the equipment carts **classic-cart** and **compact-cart** there is a risk of tilting. You should therefore order a counterweight kit (if an isolating transformer is not being installed) and check it with the equipment!

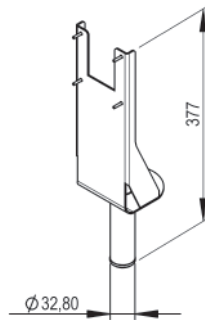

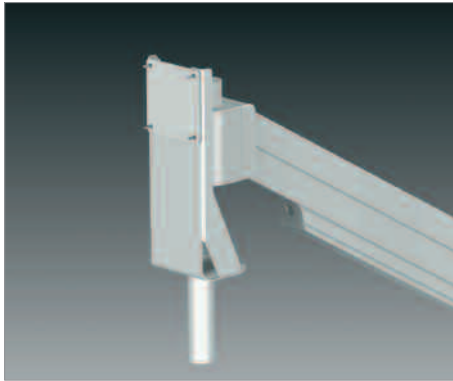

Variable height arms	VESA	Product line	Order number

JOINTED ARMS

Handle for jointed arm

The handle for the jointed arms is suitable for all variable height arms with VESA 75. The 32.8 mm handle tube diameter means that the standard protective hood can be attached to permit sterile operations.

- Material:** Aluminium
- Finish:** RAL 7035 Light Grey powder-coated
- Scope of delivery:** 1 handle with mounting hardware

	Product line	Order number
Handle for jointed arm		GW.0776.991

Variable height arm with VESA 75 / 100, length 400 mm

This variable height arm accommodates equipment and screens which have a maximum weight in the range 15 kg. The arm is height-adjustable, can be locked out and has a length of 400 mm.

- Load capacity:** 15 kg / 33 lbs
- Material:** Steel, aluminium
- Finish:** RAL 7035 Light Grey powder-coated
- Scope of delivery:** 1 variable height arm with adapter for VESA 75 / 100 with mounting hardware

	Length	Product line	Order number
Variable height arm	400 mm		ZV.9538.999

JOINTED ARMS

Jointed arm with hose clamps

The jointed arm with hose clamps comes with a fixed and a flexible arm, e.g. for secure cable management.

Working radius:	900 mm
Mounting pins:	Ø 16 mm
Special features:	Joint clamp with knobs
Load capacity:	1 kg / 2.2 lbs
Material:	Aluminium
Finish:	Matt chrome-plated, natural anodized
Scope of delivery:	1 jointed arm with 4 hose clamps, with mounting hardware

Note :

- Make sure you order an adapter piece or clamp in conformity with the method of mounting.
- You will find more detailed information on clamps on page 147.
- You will find more detailed information on adapter pieces on page 149.

HANDLES

Handle for uni-cart

This single handle can be mounted in increments of 32 mm at any free point on the **uni-cart** support column.

- Assembly:** In the front T-slots of the support column
Material: Extruded aluminium
Finish: Bracket RAL 7035 Light Grey powder-coated, handle see trim colour ¹⁾
Scope of delivery: 1 handle with mounting hardware

	Product line	Order number
Handle radiused	■	RS.0160.XXX

Handle for pro-cart

The push handle is mounted on the rear side of the support column and offers a push position at an angle of 90° to allow plenty of leg room for freedom of movement and a space-saving parking position at an angle of 15°.

- Material:** Cast aluminium / steel
Finish: Mount RAL 7035 Light Grey powder-coated
 Push handle powder-coated, see trim colour ¹⁾
Scope of delivery: 1 push handle with mounting hardware
How supplied: Factory assembly only

	Product line	Order number
Push handle	■	PT.2000.XXX

¹⁾ **Trim colour:** Make sure you replace in **uni-cart** .XXX by .901 = RAL 5021 Water Blue, .902 = RAL 5013 Cobalt Blue, .903 = RAL 7035 Light Grey
 Make sure you replace in **pro-cart** .XXX by .903 = RAL 7035 Light Grey, .908 = RAL 5015 Sky Blue, .909 = RAL 1003 Signal Yellow

Vertical handles for compact-cart

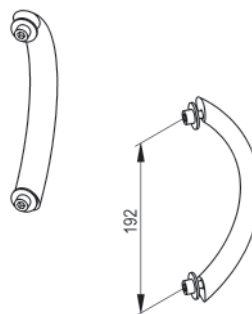

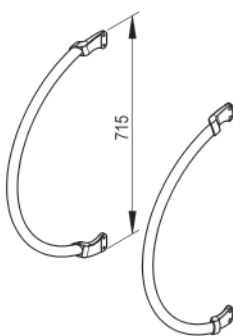

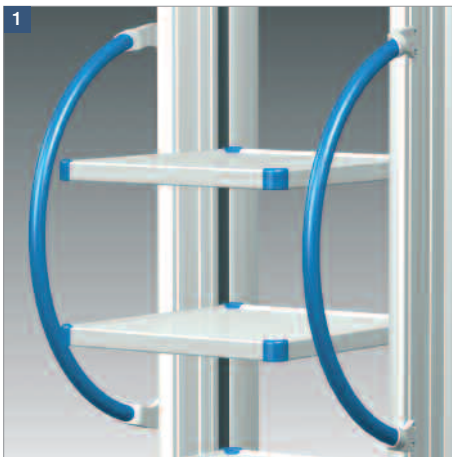

The following vertical handles are available for the **compact-cart** equipment cart:

1 Vertical round handle:

- Assembly:** On the outside T-slots of the vertical extrusions, variable height adjustment
- Material:** Aluminium
- Finish:** Handle brackets RAL 7035 Light Grey powder-coated; handle tube see trim colour 1)
- Scope of delivery:** 2 vertical round handles with mounting hardware
- How supplied:** Pre-assembled

2 Handle rear:

- Assembly:** On the rear side of the power columns
- Material:** Aluminium
- Finish:** RAL 7035 Light Grey powder-coated
- Scope of delivery:** 2 handles
- How supplied:** Factory assembly only

Note:

The vertical round handle under **1** cannot be combined with a shelf if a side pullout mousepad is mounted!

Vertical handles	Product line	Order number
1 Vertical handle front	■	FC.0217.XXX
2 Handle rear	■	FC.0215.991

1) **Trim colour:** Make sure you replace in .XXX by .903 = RAL 7035 Light Grey, .908 = RAL 5015 Sky Blue, .909 = RAL 1003 Signal Yellow

SOCKET STRIPS

All national and international socket strips in the product range of ITD GmbH are in conformity with the strict requirements of EN 60601 and are subject to CE marking in conformity with 93/42/EEC. They feature high quality and a robust metal housing. They can be supplied with a central on and off switch, or with and without a switch, depending on the model (see following table). They are optionally also available with plug removal barriers (see page 168). The socket strips can be integrated in the power unit (see page 167) and in the support column of equipment carts. Socket strips can also be attached to the vertical extrusion or shelf.

Note: The connecting cables of the socket strips are provided with moulded plugs. The sockets for these socket strips are also inclined at 45°, allowing right-angled plugs to be optimally positioned.

SOCKET STRIP MOUNTING KIT

Socket strip mounting kit for **compact-cart**

Assembly: fixed to the back of the vertical extrusion of the basic frame **compact-cart** Economy
Material: Steel
Finish: RAL 7035 Light Grey powder-coated
Scope of delivery: 1 socket strip mounting kit with mounting hardware

Suitable for the following socket strips:

- EURO, 6-way (Page 160)
- Earthed, 6-way (Page 161)
- Earthed, 8-way with switch (Page 163),
- French Standard, 6-way (Page 164)

	Product line	Order number
Socket strip mounting kit	■	FC.0302.991

Socket strip mounting kit with cable winder

The socket strip mounting kit is fixed to the back of the shelf. The cable winder is designed to accommodate surplus cabling up to 5 m in length.

Finish: RAL 7035 Light Grey powder-coated
Scope of delivery: 1 socket strip mounting kit with mounting hardware

	Installation width	Suitable for socket strips	Product line	Order number
Socket strip mounting kit with cable winder	450 mm	EURO, 6-way, Earthed, 3-way, with switch, Switzerland, 3-way, with switch	■ ■ ■	GW.0681.991

POWER-UNIT

Power-Unit for **compact-cart**

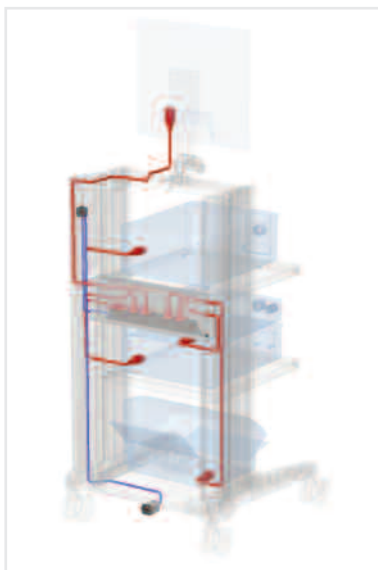

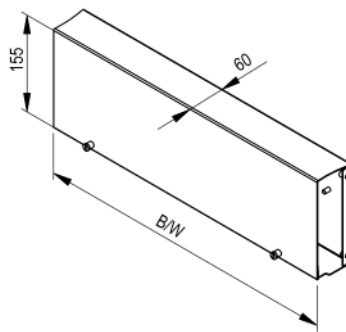

compact-cart can be optionally fitted with a power unit. This combines with the power columns to provide concealed and direct cabling, accommodates sockets and the lock mechanism protects against unauthorized access.

Assembly: Between the power columns variable height assembly in increments of 32 mm

Material: Sheet steel

Finish: RAL 7035 Light Grey powder-coated

Scope of delivery: 1 power-Unit with mounting hardware

	Installation height	Product line	Order number for installation width		
			W 450 mm	W 500 mm	W 650 mm
Power-Unit for compact-cart	5 U ¹⁾		CC.4564.991	CC.5064.991	CC.6564.991

¹⁾ 1 U = 32 mm

PLUG REMOVAL BARRIER

Plug removal barrier

The plug removal barrier prevents the plugs from being inadvertently pulled out of the socket strip and avoids unauthorized equipment from being plugged in.

1 for the support column of **uni-cart**

Assembly: In front of the socket strip installed in the support column
Mounting: With four screws in the T-slots of the support column

2 for the power columns of **classic-cart** and **endo-cart**

Assembly: In front of the socket strip installed in the power column
Mounting: Inside on the vertical extrusion

3 for the power columns of **compact-cart**

Assembly: In front of the socket strip installed in the power column
Mounting: Inside on the vertical extrusion

Material: Sheet steel

Finish: RAL 7035 Light Grey powder-coated

Scope of delivery:

- 1** 1 plug removal barrier with mounting hardware
- 2** 2 brackets with mounting hardware
- 3** 1 plug removal barrier with trim, with mounting hardware

Plug removal barrier	Suitable for socket strips	Product line	Order number
1 for the support column	3-way Schuko with switch		GW.0632.991
2 for the power columns	3- / 6- / 8-way earthed		GW.0633.991
3 for the power columns	6-/8-way EURO, 6-/8-way earthed, 6-way French standard		CC.0278.991

CABLE WINDERS

Cable winder

The cable winder accommodates maximum 5 m cable.

1 Cable winder for **uni-cart**

- Assembly:** On the rear of the support column
- Finish:** Similar to RAL 7035 Light Grey
- Scope of delivery:** 2 cable winders with mounting hardware
- How supplied:** Factory assembly only

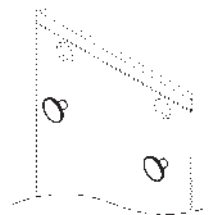

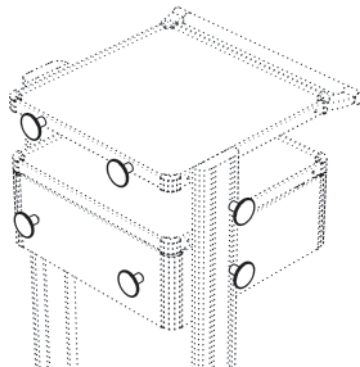

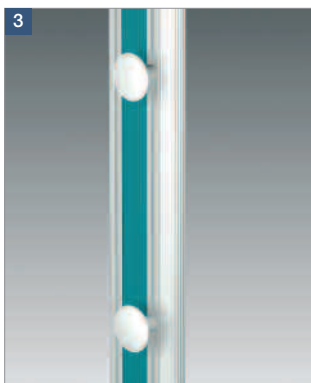

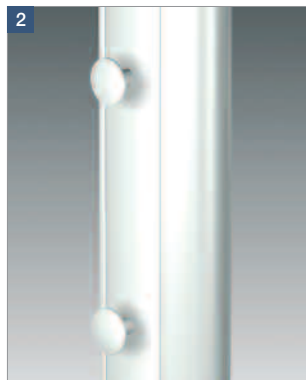

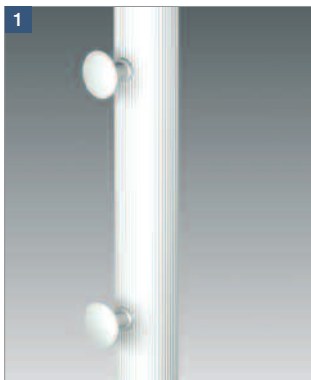

2 Cable winder for **pro-cart**

- Assembly:** On the rear of the support column
- Finish:** RAL 7035 Light Grey
- Scope of delivery:** 2 cable winders and 1 cover strip with mounting hardware

3 Cable winder for **classic-cart**, **compact-cart** and **endo-cart**

- Assembly:** On the rear panel, rear doors or at the side of the vertical extrusions
Factory assembled on the rear of the shelf or on the drawer
- Finish:** RAL 7035 Light Grey
- Scope of delivery:** 2 cable winders, supplied with mounting hardware

CABLES

Power cable for EURO socket strips

A wide range of power cables are supplied for EURO socket strips with and without equipotential bonding (see page 172 for more details).

	Power plug:	EURO socket:	Rated current:	Rated voltage:	Finish:
1	CEE7 / VII	IEC 320	10 A	250 VAC	Dark Grey
2	Type 12	IEC 320	10 A	250 VAC	Dark Grey
3	Type BS 1363	IEC 320	10 A	250 VAC	Dark Grey
4	3-pole US	IEC 320	15 A	125 VAC	Black

Power cable	Length	Product line	Order number	
			without equipotential bonding cable	with equipotential bonding cable
1 Earthed	5 m		ZV.9809.799	ZV.9620.999
2 Swiss Standard	5 m		ZV.9798.799	
3 British Standard	5 m		ZV.9860.799	
4 US-Standard Hospital Grade	5 m		ZV.9770.799	

EURO power cable

The EURO power cable is used to connect the EURO socket strip with the EURO plug of the unit.

Construction: IEC EURO socket→ IEC EURO plug

Finish: Dark Grey

Scope of delivery: 1 EURO power cable

	Length	Product line	Order number
EURO power cable	0.6 m		ZV.9773.799
	1.0 m		ZV.9960.799

Adapter cable

The adapter cable with fixed and assembled power cable incl. earthed plug is used to connect a unit with the EURO socket strip.

Construction: Earthed socket → EURO socket

Finish: Light Grey

Scope of delivery: 1 Adapter cable

	Length	Product line	Order number
Adapter cable	0.3 m		ZV.9959.799

EQUIPOTENTIAL BONDING

Equipotential plug S6 DIN 42801

Doctor and patient are at risk when uncontrolled currents occur. These are caused by potential differences between electrical equipment and external conductive parts in rooms used in medical settings. Installing uninterrupted potential equalization is the safest solution.

Material: Brass nickel-plated, sheet steel
Scope of delivery: 1x (4x, 6x or 8x) equipotential plug 6 DIN 42801
 1x (4x, 6x or 8x) colour marking disc yellow / green
 1 x mounting bracket with mounting hardware

Equipotential plug S6 DIN 42801	Product line	Order number
1 Equipotential plug		ZV.9940.999
2 Panel with 8 equipotential plugs		CC.0276.999
3 Panel with 4 equipotential plugs		RS.0125.991
4 Panel with 6 equipotential plugs		PT.0197.999

Equipotential cable

The equipotential cable is used to connect installed units with the equipotential plug.

Features: Very flexible cable 6 mm² with green and yellow PVC insulation; provided with the inclined equipotential socket KBT6 DIN on both sides.
Material: Equipotential socket: brass nickel-plated
 Cable: copper
Scope of delivery: 1 cable with inclined socket on both sides

	Length	Product line	Order number
Equipotential cable	0.3 m		ZV.9941.999
	0.5 m		ZV.9942.999
	1.0 m		ZV.9943.999
	1.5 m		ZV.9488.999
	5.0 m		ZV.9944.999

ISOLATING TRANSFORMERS

Isolating transformers are used to reduce the maximum discharge current to values in conformity with rated current.

If several units are being used on one equipment cart, the individual devices are frequently supplied with electricity via one multiple socket strip mounted on the cart. The earth-leakage currents from this equipment can add up to a value that is significantly above the permissible limit of 0.5 mA. Since the earth-leakage currents can also occur during error-free operation, the isolating transformer prevents these currents from discharging to earth through the patients or the medical staff / theatre personnel. This guarantees maximum safety for all those people involved.

The isolating transformers for **pro-cart**, **classic-cart**, **compact-cart** and **endo-cart** can also be fitted with an ELG insulation monitor. This is a visual/acoustic display element that monitors falling insulation resistance in the entire system. An acoustic alert is also given if there is a hazard. This means that the medical/theatre staff can reach a timely decision on whether the procedure should be completed or whether it needs to be brought to a controlled end. It is also possible to check the overall status of the system before every examination. However, this does not replace the test/maintenance intervals laid down for individual units.

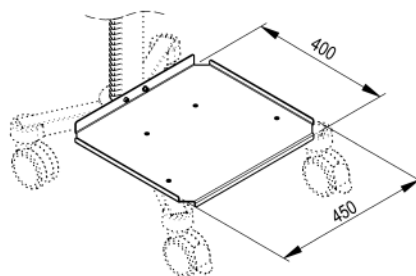

Isolating transformer for uni-cart

The isolating transformer for **uni-cart** has the following features:

Power:	660 VA
Input/output voltage:	115 V / 115 V or 230 V / 230 V, 50 Hz / 60 Hz – reversible
Power input:	IEC 320 EURO input for use of country-specific power cables
Design:	Annular core transformer in conformity with IEC 601-1 / EN 60601-1, CE marking
Conditionally short-circuit proof:	In conformity with IEC 742 and IEC 601-1
Inrush current limitation:	Electronically regulated, to approx. 15 A
Safety class:	1
Insulation voltage:	4 KV
Fuse protection:	Primary 2-phase

Scope of delivery: 1 isolating transformer with rack base and central ON / OFF switch on the right-hand side of the enclosure
 1 power cable earthed 5 metres
 3 EURO cable for connecting to the unit
 1 panel with 4x equipotential bonding plugs (assembled at the front on the **uni-cart** extrusion)

How supplied: Factory assembly only

Note:

- You will find country-specific power cables on page 170.
- Please order conductive castor set, Ø 100 mm, separately if needed. (see page 111).

Isolating transformer for uni-cart	Installation height	Product line	Order number
660 VA with EURO connecting cable	3 U ¹⁾	■	ZV.9412.999

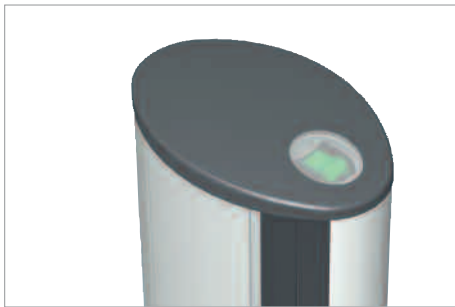

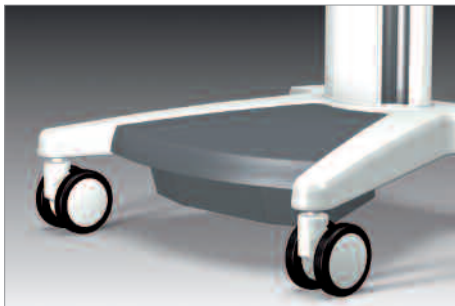

¹⁾ 1 U = 32 mm

ISOLATING TRANSFORMER

Isolating transformer for **pro-cart**

The isolating transformer for **pro-cart** has the following features:

Power:	660 VA / 1200 VA
Input/output voltage:	115 V / 115 V or 230 V / 230 V, 50 Hz / 60 Hz - reversible
Power input:	IEC 320 EURO input for use of country-specific power cables
Design:	Annular core transformer in conformity with IEC 601-1 / EN 60601-1, CE marking
Inrush current limitation:	Electronically regulated, to approx. 15 A
Safety class:	1
Insulation voltage:	4 KV
Fuse protection:	Primary: 2-phase Secondary: 1-phase at socket strip
Scope of delivery:	1 isolating transformer with basic trim 1 central on/off switch on the top of the support column 1 power cable earthed 5 m 1 EURO socket strip 4-way or 6-way IEC 320 with 4 or 6 equipotential plugs
How supplied:	Factory-assembled only

Note:

- You will find country-specific power cables on page 170
- The isolating transformer can also be supplied with an insulation monitor (see page 177)
- Please order conductive castor set, Ø 100 mm, separately if needed. (see page 111).

Isolating transformer for pro-cart	Product line	Order number
660 VA with 4-way EURO socket strip	■	ZV 9446.999
1200 VA with 6-way EURO socket strip	■	ZV 9447.999

ISOLATING TRANSFORMER

Isolating transformer for classic-cart and endo-cart

The particularly flat design of the integrated isolating transformer 660 VA, 1000 VA or 1600 VA also permits installation with the Ø 100 mm castors installed in the basic frame as standard.

Power :	660 VA / 1000 VA / 1600 VA
Input/output voltage:	115 V / 115 V or 230 V / 230 V, 50 Hz / 60 Hz - reversible
Power input:	IEC 320 EURO input for use of country-specific power cables
Design:	Annular core transformer in conformity with IEC 601-1 / EN 60601-1, CE marking
Conditionally short-circuit proof:	In conformity with IEC 742 and IEC 601-1
Inrush current limitation:	Electronically regulated, to approx. 15 A
Safety class:	1
Insulation voltage:	4 KV
Fuse protection:	Primary (2-phase) and secondary (1-phase on the socket strip)
How supplied:	Factory assembly only
Scope of delivery:	1 Isolating transformer mounted in the base, in each case with the following power:

Equipped with:	660 VA	1000 VA	1600 VA
■ Central on/off switch	Standard	Standard	Standard
■ Power cable earthed 5 metre	Standard	Standard	Standard
■ EURO socket strip each with 1x equipotential	4-way	8-way	8-way
■ Castor conversion kit conductive Ø 125 mm	Optional	Optional	Optional
■ Insulation monitor	Optional	Optional	Optional

Optional equipment with the insulation monitor ELG:

■ Operate value:	53 kOhm
■ Test resistance:	33 kOhm
■ Input voltage:	150 V / 230 V ± 15%, 50 Hz / 60 Hz
■ Alternating current internal resistance:	220 kOhm
■ Direct current internal resistance:	320 kOhm
■ Measured direct voltage:	12 V
■ Maximum measured current:	< 0,5 mA
■ Maximum permissible external direct voltage:	250 V DC

Note:

- You will find country-specific power cables on page 170.
- Please order castor set Ø 100 mm or Ø 125 mm, separately if needed (see page 111).

ISOLATING TRANSFORMER

Isolating transformer for compact-cart

The particularly flat design of the integrated isolating transformers 1200 VA or 2000 VA also permits installation with the Ø 100 mm castors installed in the basic frame as standard.

Power:	1200 VA / 2000 VA
Input/output voltage:	1200 VA = 115 V / 115 V or 230 V / 230 V, 50 Hz / 60 Hz - reversible 2000 VA = 230 V / 230 V, 50 Hz / 60 Hz
Power input:	1200 VA / 2000 VA = IEC 320 EURO input for use of country-specific power cables
Design:	Annular core transformer in conformity with IEC 601-1 / EN 60601-1, CE marking
Conditionally short-circuit proof:	In conformity with IEC 742 and IEC 601-1
Inrush current limitation:	Electronically regulated, to approx. 15 A
Safety class:	1
Insulation voltage:	4 KV
Fuse protection:	Primary: 2-phase
How supplied:	Factory assembly only
Scope of delivery:	1 Isolating transformer mounted in the base, in each case with the following power:

Equipped with:	1200 VA	2000 VA
■ Central on/off switch	Standard	Standard
■ Power cable earthed 5 meter	Standard	Standard
■ EURO socket strip 6- or 8-way	Standard	Standard
■ Equipotential panel with 6-way or 8-way connection	6-way	8-way
■ Castor conversion kit conductive Ø 100 mm or Ø 125 mm	Optional	Optional
■ Insulation monitor	Optional	Optional

Optional equipment with the insulation monitor ELG:

■ Operate value:	53 kOhm
■ Test resistance:	33 kOhm
■ Input voltage:	150 V / 230 V ± 15% 50 Hz / 60 Hz
■ Alternating current internal resistance:	220 kOhm
■ Direct current internal resistance:	320 kOhm
■ Measured direct voltage:	12 V
■ Maximum measured current:	< 0,5 mA
■ Maximum permissible external direct voltage:	250 V DC

Note:

- You will find country-specific power cables on page 170
- Please order castor set Ø 100 mm or Ø 125 mm, separately if needed (see page 111).

Isolating transformer	Product line	Order number	
		without insulation monitor	with insulation monitor
1200 VA with 6-way EURO socket strip	■	ZV.9482.999	ZV.9483.999
2000 VA with 8-way EURO socket strip	■	ZV.9496.999	ZV.9497.999

2000 VA / 115 V version available on request

INSULATION MONITOR

Insulation monitor ELG for **pro-cart**

The functionality of the isolating transformer for **pro-cart** can also be expanded with insulation monitor ELG. This can be connected using simple Plug and Play technology. It only takes up one socket on the EURO socket strip.

This involves a visual and acoustic signal that alerts the user to falling insulation resistance in the entire system over the critical range by means of an illuminated diode. An acoustic alert is also given if there is a hazard. It is also possible to check the overall status of the system before every examination or operation. However, this does not replace the test/maintenance intervals laid down for individual units.

Supply voltage:	230 V / AC $\pm 15\%$
Operate value:	53 kOhm
Test resistance:	33 kOhm
Alternating current internal resistance:	220 kOhm
Direct current internal resistance:	320 kOhm
Max. measured voltage:	12 V
Maximum measured current:	< 0,5 mA
Maximum permissible external direct voltage:	250 V DC

Assembly:	In the front slots of the support column
Scope of delivery:	1 insulation monitor ELG 1 cover strip with mounting hardware

Note:

On request, the insulation monitor ELG is also supplied for **pro-cart** with a supply voltage of 115 V.

	Installation height	Product line	Order number
Insulation monitor ELG 230 V	7 E ¹⁾	■	PT.2008.991

MOUNTING HARDWARE

Spring nuts M6

The spring nuts are clipped into the T-slots at any point and are used for mounting system elements and accessories.

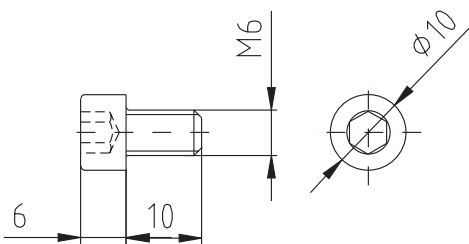

Material: Steel St 1203, Finish zinc-plated and spring band stainless steel Nirosta 4310 micro-encapsulated

	Scope of delivery	Order number
Spring nut M6	50 Spring nuts	ZV.9851.999

Hexagon socket-head cap screws M6 x 10

■ Micro-encapsulated

	Scope of delivery	Order number
Hexagon socket-head cap screws M6 x 10	50 Screws	ZV.9852.999

ITD IST WELTWEIT FÜR SIE DA

Gerne auch persönlich ...

Sie sind herzlich eingeladen, unsere Geräteträger in unserem Ausstellungsraum in Unterhaching live zu erleben. Oder möchten Sie lieber „vor Ort“ beraten werden? Dann kommt unser Medizinprodukteberater gerne zu Ihnen.

In beiden Fällen bitten wir Sie um eine kurze telefonische Terminabsprache.

... oder lieber online ...

Dann klicken Sie bitte unsere Website an. Dort erwarten Sie immer die neuesten Informationen und Produkte. Dazu Downloadmöglichkeiten von Katalogen und Planungshilfen.

www.itd-cart.com

... oder durch unsere nationalen und internationalen Repräsentanten

Unseren Kunden im In- und Ausland stehen unsere Händler und Auslandsvertretungen jederzeit mit Beratung und Service zur Verfügung. Die Adressen finden Sie ebenfalls auf unserer Website.
